

Potato Store Managers Course

Tuesday 19th and Wednesday 20th of January 2027
Huntingtower Hotel, Crieff Road, Perth, PH1 3JT

Join us for a practical two-day workshop designed for store managers, farmers, and potato industry professionals looking to strengthen their skills and deepen their understanding of successful potato storage.

With rising energy costs, reduced pesticide availability, and new sprout suppressant products, effective store management has never been more important. This updated programme reflects the latest challenges and technologies in the sector.

Course Highlights

- Principles of crop physiology and storage
- Ventilation, temperature, and condensation management
- Pest and disease issues in store, and how they can be managed
- Hygiene and store safety
- Energy and carbon considerations
- BASIS and NRoSO points available

Delivered by the SAC Consulting Potatoes Team, with special guest Adrian Cunnington from Potato Storage Insight.
